- ☎ +92-303-0925-333
- 📍 224/51, Bahria Town Phase 8, Rawalpindi

Profile Summary

Proficient and backend-focused Full Stack Developer with over a year of experience designing and deploying modern web applications. Adept at building scalable, high-performance backend architectures using Node.js, Python, Django, Flask, and Next.js. Versatile in front-end technologies including React, Tailwind CSS, and responsive UI design. Currently exploring AI integrations, GoLang, and Machine Learning, with a strong commitment to continuous learning and clean, testable code. Experienced in version control with Git/GitHub, functional programming principles, and production deployments using cloud platforms. Known for problem-solving, code quality, and aligning development with business needs.

Education

O Levels – Ongoing
Expected Completion: 2026

Work Experience

2025 Backend Development Intern
Firefly Tech Solutions
Developed scalable web apps with Node.js, Django, and Python, enhancing backend efficiency and UX. Designed RESTful APIs, integrated third-party services, and optimized data flow. Built responsive UIs with React/Next.js, boosting SEO and reducing load time by 15%. Ensured code quality with reviews, testing, and best practices while collaborating in agile teams under tight deadlines.
